

# John Marshall, PhD

**Address:** Division of Epidemiology & Biostatistics, School of Public Health, 2121 Berkeley Way  
University of California, Berkeley, CA 94720-7360, USA

**Phone:** +1-510-664-4724, **Email:** [john.marshall@berkeley.edu](mailto:john.marshall@berkeley.edu)

**Website:** <http://www.MarshallLab.com>

## Short Bio

I am a mathematical biologist with expertise in infectious disease modeling, malaria epidemiology and the use of novel, genetics-based strategies to reduce the burden of mosquito-borne diseases. I have worked on several aspects of gene drive technology, including the use of mathematical models to inform construct design, fitting models to experimental data, and modeling mosquito ecology and the epidemiology of mosquito-borne diseases. I also have experience in the field and with addressing social, cultural and regulatory aspects of my work. In my current position at UC Berkeley, I teach two courses on mathematical modeling of infectious diseases, consult generally in this field, and direct a laboratory specializing in mathematical models of mosquito-borne diseases and novel strategies for their control and elimination.

## Appointments

2015 (January)-:

### Assistant Professor in Residence

Division of [Epidemiology & Biostatistics](#), [School of Public Health](#), [UC Berkeley](#)

- Conducting research on mathematical epidemiology, malaria elimination and novel vector control strategies including the use of mosquitoes engineered with CRISPR-based gene drive systems
- Teaching graduate level courses on biostatistics and mathematical modelling of infectious diseases
- Mentoring graduate students in epidemiology, biostatistics, computational biology and mathematical modeling

2012 (October)-2014 (December):

### Medical Research Council Research Fellow

[Department of Infectious Disease Epidemiology](#), [Imperial College London](#)

- Worked towards designing confined field trials of GM mosquitoes on islands off the coast of Africa
- Developed skills in analysis of large data sets – data cleaning, cluster analysis, model fitting and Markov Chain Monte Carlo methods
- Mentored graduate students in global health and mathematical modeling

2013 (October)-2014 (April):

### Visiting Scholar

[Center for Theoretical Evolutionary Genomics](#), [UC Berkeley](#)

- Investigated methods to determine the structure and demographic history of malaria-transmitting mosquito populations from genomic data
- Developed skills in population genetics and Approximate Bayesian Computation

2010 (August)-2012 (September):

### Research Associate

[Department of Infectious Disease Epidemiology](#), [Imperial College London](#)

- Conducted surveys of human movement patterns of relevance to malaria transmission in Mali, Burkina Faso, Zambia and Tanzania
- Developed models for mosquito control and malaria epidemiology
- Mentored graduate students in epidemiology and field work
- Co-organized a course on mathematical modeling of infectious diseases for

public health professionals

2009 (July)-2010 (July):

**Postdoctoral Scholar**

[Division of Biology and Biological Engineering, Caltech](#)

- Designed new gene drive systems and developed mathematical models describing their spread
- Developed skills in genetic engineering and maintaining laboratory mosquito lines
- Trained graduate and postdoctoral students in population genetics

2009 (January-June):

**Postdoctoral Fellow**

[Center for Society & Genetics, UCLA](#)

- Analyzed surveys on the perspectives of people in Mali, West Africa to genetically modified mosquitoes for malaria control
- Analyzed international regulations for the environmental release of genetically modified mosquitoes
- Developed and lectured a class entitled "Genetic engineering in developing countries"

2008 (July-December):

**Postdoctoral Researcher**

[Department of Ecology & Evolutionary Biology, UCLA](#)

Based at: [Malaria Research and Training Center, University of Bamako](#), Mali

- Led a research team surveying the perspectives of people in Mali, West Africa to GM mosquitoes for malaria control
- Participated in ecological studies of mosquito dispersal
- Lectured and helped organize a WHO-sponsored workshop on developing a regulatory framework for releasing GM mosquitoes in Africa

2001 (January-December):

**Editor**

[Craccum magazine, Auckland University Students' Association](#), New Zealand

- Edited a 48-page weekly magazine for students at the University of Auckland
- Managed a staff of ~30 writers, photographers, distributors, designers, webmasters and advertising managers
- Developed excellent skills in written and verbal communication, leadership and time management

**Education**

2003 (August)-2008 (June):

**PhD (Biomathematics)**

[UCLA](#)

PhD thesis: [The dynamics of transposable elements in genetically modified mosquito vectors](#)

2003 (August)-2005 (December):

**MS (Biomathematics)**

[UCLA](#)

2000 (February)-2002 (November):

**BTech (Hons) (Optoelectronics)**

[University of Auckland](#), New Zealand

1997 (February)-1999 (November):

**BSc (Biological sciences)**

[University of Auckland](#), New Zealand

## Technical Skills and Competences

### Mathematics:

- Multivariate calculus, linear algebra, vector calculus
- Ordinary and partial differential equations, reaction-diffusion systems
- Probability theory, Markov chains, branching processes
- Applications to epidemiology, molecular biology, genetics and ecology

### Statistics:

- Regression, generalized linear models, maximum likelihood estimation
- Analysing large data sets, cluster analysis
- Bayesian statistics, Markov Chain Monte Carlo methods, Approximate Bayesian Computation
- Applications to epidemiology, demography and population genetics

### Software and programming:

- Mathematics: Matlab, Mathematica, Maple, Berkeley Madonna
- Statistics: R, WinBUGS, ABC Toolbox
- Programming languages: C++, Java, Python

### Biology:

- Molecular biology: manipulation of DNA, cloning, PCR, gel electrophoresis
- Ecology: mosquito husbandry, mark-release-recapture experiments

### Social science and ethics:

- Quantitative and qualitative survey design, questionnaire writing, ethnography
- Research protocols for Institutional Review Boards

### Languages:

- English (mother tongue)
- French, Bambara (African language spoken in Mali) (intermediate)
- Spanish (beginner)

## Teaching

2015-2018: Lecturer, [PB HLTH 252B: Modeling the Dynamics of Infectious Disease Processes](#), UC Berkeley (Spring semester, 3 units, ~20 students)

2015-2018: Lecturer, [PB HLTH 290: Infectious Disease Modeling Seminar](#), UC Berkeley (Fall semester, 1 unit, ~16 students)

2015-2016: Lecturer, [PB HLTH 145: Statistical Analysis of Continuous Outcome Data](#), UC Berkeley (Fall semester, 4 units, ~45 students)

2011-2014: Co-organizer/lecturer/demonstrator, [Short Course in Epidemiology](#), Imperial College London (Summer, professional course, ~30 students)

2009: Lecturer, Genetic Engineering in Developing Countries, UCLA (Winter quarter, 2 units, ~20 students)

2008-2010: Lecturer, Biosafety training course for Africa related to the potential release of genetically modified disease vectors, University of Bamako (Summer, professional course, ~20 students)

2005: Lecturer/demonstrator, Hidden Markov Models for Bioacoustic Analysis, UCLA (Spring quarter, 2 units, ~15 students)

### Awards:

School of Public Health Committee on Teaching Excellence Award (Spring 2015, Fall 2015, Spring 2016, Fall 2016, Spring 2017, Spring 2018)

## Grants Awarded

CITRIS and the Banatao Institute seed funding grant, "[Machine Learning for Vector-borne Disease Surveillance.](#)" (2019-2020) Role: PI (\$12,500 to Marshall Lab, \$25,000 total).

DARPA grant, "[Safely engineering various classes of gene drives to control a major invasive disease vector, \*Ae. aegypti\*.](#)" (2017-2021) Role: Co-PI (\$1,809,506 to Marshall Lab, \$14,949,052 total).

Innovative Genomics Institute grant, "[CRISPR-Cas9-based gene drive architecture for control of agricultural pests.](#)" (2017-2020) Role: PI (\$246,000 award to Marshall Lab).

UC Irvine sub-contract, "[UC Irvine Malaria Initiative.](#)" (2017-2019) Role: Subaward PI (\$335,500 sub-award to Marshall Lab).

University of Washington sub-contract, "[Strategic planning tools for staging malaria elimination.](#)" (2017-2018) Role: Subaward PI (\$68,240 sub-award to Marshall Lab).

UC Berkeley sub-contract, "[Effects of agricultural expansion and intensification on infectious diseases.](#)" (2017) Role: Sub-contractor (\$12,194 sub-award to Marshall Lab).

UC Davis SVM Vector-Borne Disease Pilot Grant Program, "[Working toward the eradication of \*Aedes aegypti\*, an invasive arbovirus vector, in California.](#)" (2016-2017) Role: Co-I (\$25,000 total).

Gates Foundation sub-contract, "[Prototype of technology's role to facilitate surveillance needs for malaria elimination.](#)" (2015-2017) Role: Subaward PI (\$26,695 sub-award to Marshall Lab).

University of California Institute for Mexico and the United States grant, "[Determining optimal strategies for the control of vectors of dengue and other vector borne diseases in Mexico and the United States.](#)" (2015-2016) Role: PI (\$12,500 to Marshall Lab, \$25,000 total).

Sean Parker Foundation grant "[Malaria Elimination Initiative on a new vector control for malaria elimination.](#)" (2015-2016) Role: Subaward PI (\$80,832 sub-award to Marshall Lab).

UC Davis Signature Research in Genomics Program Award, "[Advanced genomic tools for estimating dispersal of African malaria vectors.](#)" (2015-2016) Role: Co-I (\$45,000 total).

UK Medical Research Council grant, "[Optimal trial design for a confined release of malaria-refractory transgenic mosquitoes.](#)" (2012-2015) Role: PI (£285,103 award to Marshall Lab).

**Marshall JM** (2016) [Overcoming evolved resistance to population-suppressing homing-based gene drives](#). Contributed poster at the 65<sup>th</sup> Annual Meeting of the American Society for Tropical Medicine and Hygiene, Atlanta, Georgia.

**Marshall JM** (2016) [Designing disease control strategies using models and data from multiple sources](#). Invited talk at the ENAR 2016 Spring Meeting, Austin, Texas.

**Marshall JM** (2016) [Zika virus: Insights from mathematical models](#). Invited talk at the Preparedness for Zika Virus Symposium, University of California, San Francisco, California.

**Marshall JM** (2017) [Parameter estimation in infectious disease epidemiology: Do you have any better ideas?](#) Invited talk at the Workshop in Biostatistics, Department of Biomedical Data Science, Stanford University, Stanford, California.

**Marshall JM** (2017) [Gene drive: What is possible at the population level with currently-available molecular components?](#) Invited talk at:

- the Lorentz Center workshop on “Challenges for the Regulation of Gene Drive Technology”, Leiden, the Netherlands,
- the 25<sup>th</sup> International Congress of Entomology, Orlando, Florida,
- the Statistics and Genomics Seminar, Division of Biostatistics, University of California, Berkeley, California,
- the Department of Medicine, University of California, San Francisco, California,
- the Joint Genome Institute, Walnut Creek, California, and
- Henry Stewart Talks on “Gene Drives and Active Genetics”, <https://hstalks.com/t/3764/gene-drive-what-is-possible-at-the-population-level/>.

**Marshall JM** (2017) [Gene drive: Modeling replacement, suppression and remediation in quantified ecosystems](#). Invited talk at the LAVIPAC workshop on “Innovative Vector Control Strategies in the Pacific”, Moorea, French Polynesia.

**Marshall JM** (2017) [Why has dengue resurged, why does malaria persist, and can these diseases be controlled by CRISPR-based gene drive and other novel tools?](#)

Invited talk at:

- the Guangzhou Center for Disease Control and Prevention, Guangdong, China, and
- the National Health Research Institutes, Zhunan, Taiwan.

**Marshall JM** (2018) [Can malaria, dengue and Zika be controlled by CRISPR-based gene drive and other novel tools?](#) Invited talk at:

- the Harvard Medical School, Harvard University, Boston, Massachusetts,
- the Department of Biological Sciences, University of Notre Dame, Notre Dame, Indiana,
- the Jet Propulsion Laboratory, California Institute of Technology, Pasadena, California, and
- the QIMR Berghofer Medical Research Institute, Brisbane, Australia.

**Marshall JM** (2018) [Designing safe strategies to eliminate malaria using gene editing](#). Invited talk at:

- the Bay Area World Malaria Day Symposium, Zuckerberg San Francisco General Hospital, San Francisco, California, and
- the [School of Public Health 75<sup>th</sup> Anniversary Research Showcase](#), University of California, Berkeley, California.

**Marshall JM** (2018) [CRISPR-Cas9-based gene drive architecture for control of agricultural pests](#). Invited talk at the Plant Genome Engineering Symposium, University of California, Berkeley, California.

Sánchez HM, Wu SL, Bennett JB, **Marshall JM** (2018) [MGDrivE: A simulation framework for gene drive in spatially-explicit mosquito populations and its application to threshold-dependent systems](#). Invited talk/poster at:

- the Annual Meeting of the Society for Mathematical Biology, Sydney, Australia,
- the 67<sup>th</sup> Annual Meeting of the American Society for Tropical Medicine and Hygiene, New Orleans, Louisiana, and
- the Annual Meeting of the Entomological Society of America, Vancouver, Canada.

**Marshall JM** (2018) [Fighting mosquito-borne diseases with genomics, machine learning and likelihood functions](#). Invited talk at:

- the School of Public Health Brown Bay Series, University of California, Berkeley, California,
- the Chan Zuckerberg Biohub, San Francisco, California, and
- Verily Life Sciences, South San Francisco, California.

## Memberships

2016-current: American Society for Tropical Medicine and Hygiene (ASTMH)

## Professional Service

### Reviewer for:

Science; Nature Biotechnology; Proceedings of the National Academy of Sciences USA; Lancet Infectious Diseases; eLife; PLoS Computational Biology; PLoS ONE; Journal of Theoretical Biology; Journal of the Royal Society Interface; Proceedings of the Royal Society B; Malaria Journal; American Journal of Tropical Medicine and Hygiene; BMC Biology; Mathematical Biosciences; Acta Tropica; BioSystems; Journal of Computational Science; Transactions of the Royal Society of Tropical Medicine and Hygiene; Infection, Genetics and Evolution; Electronic Journal of Biotechnology; Asia-Pacific Journal of Molecular Biology and Biotechnology; British Journal of Medicine and Medical Research; Evolutionary Applications

### Grant reviewer for:

European Research Council, UK Medical Research Council

### Expert advisor for:

US National Academy of Sciences, The Cartagena Protocol on Biosafety to the Convention on Biological Diversity, Ad Hoc Technical Expert Group on Synthetic Biology to the Convention on Biological Diversity, Médecins Sans Frontières

## Referees

### Professor Bruce A. Hay

Division of Biology and Biological Engineering  
California Institute of Technology  
Email: [haybruce@caltech.edu](mailto:haybruce@caltech.edu)  
Phone: +1-626-395-3399

### Professor Azra C. Ghani

Department of Infectious Disease Epidemiology  
Imperial College London  
Email: [a.ghani@imperial.ac.uk](mailto:a.ghani@imperial.ac.uk)  
Phone: +44-20-7594-5764

### Professor Charles E. Taylor

Department of Ecology and Evolutionary Biology  
University of California, Los Angeles  
Email: [taylor@biology.ucla.edu](mailto:taylor@biology.ucla.edu)  
Phone: +1-310-825-6850

### Professor Anthony A. James

Department of Molecular Biology and Biochemistry  
University of California, Irvine  
Email: [ajames@uci.edu](mailto:ajames@uci.edu)  
Phone: +1-949-824-5930

**Professor Gregory C. Lanzaro**

Department of Pathology, Microbiology and Immunology

University of California, Davis

Email: [gclanzaro@ucdavis.edu](mailto:gclanzaro@ucdavis.edu)

Phone: +1-530-752-5652
